

Phantom Test Technical Design Document

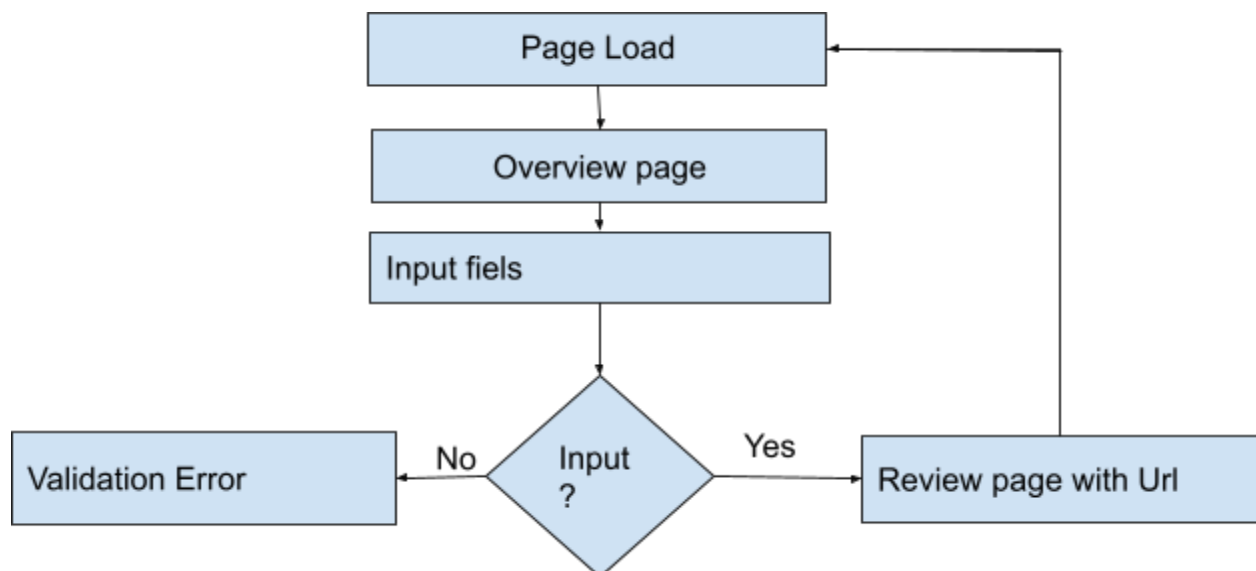

Introduction:

This test was given to demonstrate the coding skills and also to solve the problem statement mentioned in the section Requirements. The solution is provided using HTML5,CSS,Javascript and JQuery. It has been hosted on a public URL to access the web application.

Requirements:

Develop a Javascript web app that maintains a list of bookmarks (links). The user is able to add/edit/delete any link in the list. The application should use only front end technologies.

Solution:

Note:

1. Functionality like Edit/delete is not included here.

Technologies:

Overview page and Review Page is written in HTML5

It is also embedded with bootstrap for styling purpose

Styles are written in CSS

Functions are written in Javascript and JQuery.

Limitations:

1. Cannot find your urls/links if you opened the page on a new browser/device.
